Kirklees Local Area Profile

GAMBLING ACT 2005

1. Introduction and Background

<u>The Licensing Objectives</u>

In exercising most of their functions under the Gambling Act 2005, licensing authorities must have regard to the licensing objectives as set out in section 1 of the Act. The licensing objectives are:

- Preventing gambling from being a source of crime or disorder, being associated with crime or disorder or being used to support crime
- Ensuring that gambling is conducted in a fair and open way
- Protecting children and other vulnerable persons from being harmed or exploited by gambling

It should be noted that the Gambling Commission has stated: "The requirement in relation to children is explicitly to protect them from being harmed or exploited by gambling".

The council is aware that, as per Section 153, in making decisions about premises licences and temporary use notices it should aim to permit the use of premises for gambling in so far as it thinks it is:

- in accordance with any relevant code of practice issued by the Gambling Commission
- in accordance with any relevant guidance issued by the Gambling Commission
- reasonably consistent with the licensing objectives and
- in accordance with the authority's statement of licensing policy

<u>Local Risk Assessment</u>

It is a requirement of the Gambling Commission's Licence Conditions and Codes of Practice (LCCP), for licensees to assess the local risks to the licensing objectives posed by the provision of gambling facilities at their premises and have policies, procedures and control measures to mitigate those risks. In making risk assessments, licensees must take into account relevant matters identified in this policy.

In undertaking a local risk assessment the Council will expect the operator, as a minimum to take into account:

- whether the premises is in an area of deprivation
- whether the premises is in an area subject to high levels of crime and/or disorder
- the ethnic profile of residents in the area
- the demographics of the area in relation to vulnerable groups
- the location of services for children such as schools, playgrounds, and other areas where children will gather
- health information and data relating to gambling related harm

The local risk assessment should also show how vulnerable people, including people with gambling dependencies, are protected.

This Local Area Profile has been produced to aid applicants in giving careful consideration to the points above when making an application. The Council recognises that it cannot insist on

applicants using the local area profile when completing their risk assessments. However, an applicant who decides to disregard the profile may face additional representations and the expense of a hearing as a result.

2. Gambling Related Harm

The Local Government Association defines gambling related harm as:

"Any type of repetitive gambling that disrupts or damages personal, family or recreational pursuits. It can have many and varied impact, including on an individual's physical and mental health, relationships, housing and finances, and affect a wide range of people, such as families, colleagues and wider local communities." [1]

It is with this in mind that Kirklees Council seeks to ensure that gambling premises and license holders are aware of, and committed to ensuring that gambling activity is carefully monitored and that those at risk of gambling related harm are identified and offered appropriate support.

Who is most at risk?

Research and evidence shows that there are a number of population groups who are more at risk of gambling related harm[2]. These are:

- Children, adolescents and young adults (including students)
- People with mental health issues, including those experiencing substance abuse problems
- Individuals from certain minority ethnic groups, such as Asian/Asian British, Black/Black British and Chinese/other ethnicity
- The unemployed
- The homeless
- Those with low intellectual functioning
- Problem gamblers seeking treatment
- People with financially constrained circumstances
- Those living in deprived areas

What is the impact?

The impact of gambling can have a significant effect on an individual's physical, mental and social health. However, the impact can also extend beyond an individual – affecting relationships, families, friends, workplaces and communities. This is demonstrated below[3]:

---

[1] Tackling gambling related harm; a whole council approach; Local Government Association and Public Health England; 2018.

[2] Tackling gambling related harm; a whole council approach; Local Government Association and Public Health England; 2018.

[3] Tackling gambling related harm; a whole council approach; Local Government Association and Public Health England; 2018.

INDIVIDUAL	FAMILY AND FRIENDS	WORKPLACES, CLUBS, GROUPS	COMMUNITY	SOCIETY
• stress, depression, anxiety, MH issues • job loss • financial hardship • family and relationship issues • loss of social supports and community connections	• family neglect, domestic violence, relationship breakdown • poverty • homelessness • stigma and social isolation	• absenteeism • job loss • poor performance • theft • lower participation rates	• reduced resources available • increased reliance on welfare supports • community disempower-ment • poverty	• less employment created by spending in gambling industry compared to other areas • increased crime and associated costs • poor performance • loss of confidence in government due to perceived conflict of interest • regressive tax

3. Our Approach to the Local Area Profile

Each locality with Kirklees has its own character and challenges. In order to assist applicants in completing their local risk assessments, the Council has published this Local Area Profile. The local area profile should be given careful consideration when making an application. Applicants may be asked to attend a meeting with licensing officers to discuss the profiles, appropriate measures to mitigate risk in the area and how they might be relevant to their application. The local area profile will be presented to any subsequent licensing sub-committee when they determine an application that has received representations.

The Council recognises that it cannot insist on applicants using the local area profile when completing their risk assessments. However, an applicant who decides to disregard the profile may face additional representations and the expense of a hearing as a result.

3.1 Creating the Kirklees Local Area Profile

A local area profile is an assessment of the key characteristics of Kirklees in the context of gambling-related harm. The information presented helps to provide a better understanding of the types of people that may be more vulnerable to gambling-related harm and where they are located.

We have used spatial analysis to visualise potential vulnerability to gambling-related harm in Kirklees. By mapping certain risk factors associated with gambling related harm we will identify areas of higher risk with regards to vulnerability to gambling-related harm.

Based on the evidence outlined in the section above about which groups may be most at risk of gambling-related harm, the following thematic data was mapped and used to create a 'Gambling Harm Risk Index':

- Deprivation (Index of Multiple Deprivation rankings)
- Unemployment
- Ethnic minorities
- Young people (aged 11-24)
- Crime and ASB rates

Each LSOA in the District was given score of 1 – 5 for each of the factors, which were then combined to give an overall 'Gambling Harm Risk Score'; the higher the score, the more at risk an area's population may be to gambling-related harm.

To give additional context, the following point data was also mapped:

- Existing gambling establishments
- Educational establishments
- Community centres
- GP surgeries
- Places of worship
- Job centres

In order for the Local Area Profile to be meaningful are easy to use, we divided the District into ten locality areas:

Gambling Local Area Profile - Ten Locality Split
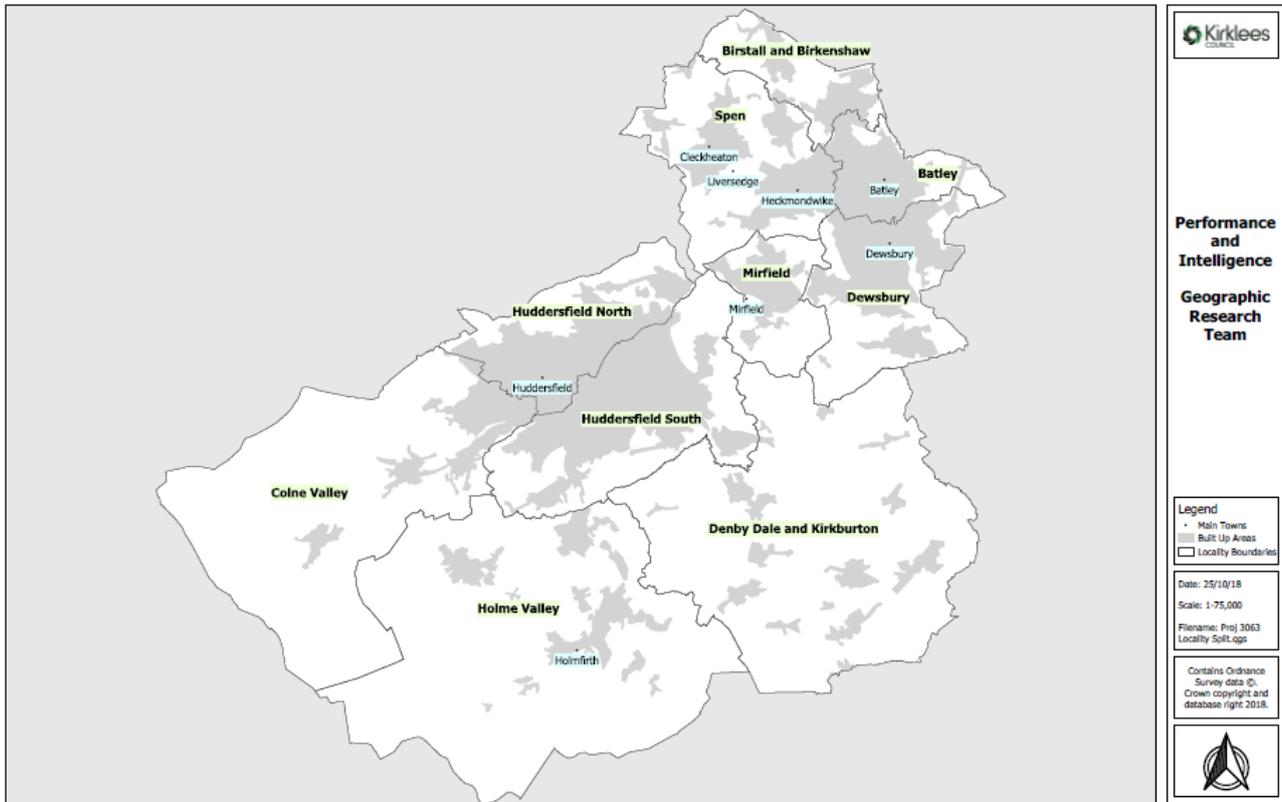

4. The Local Area Profile

4.1 The Kirklees Area

Kirklees Council is situated in West Yorkshire, which contains 5 metropolitan councils in total. The council area has a population of approximately 440,000, making it the largest metropolitan district not based on a city in terms of population. The population has increased by 8.4% since 2002, and is predicted to rise a further 9.9% by 2030. The number of households is expected to increase 20% by 2039. In terms of area it is the third largest in West Yorkshire, covering 157 square miles. The council area is mainly rural in the south with a central urban area around large towns. The area also comprises of several smaller towns of varying sizes. These areas are shown on the map above.

Kirklees has a varied population – many ethnicities are represented, speaking a range of languages and bringing a cultural diversity to the region. A thriving student community based around the University of Huddersfield attracts students from around the world. 21% of the Kirklees population are from an ethnic minority background; significantly higher than the Yorkshire & Humber average of 11% and the national average of 14%. Some parts of Kirklees are much more ethnically diverse than others, with high numbers of ethnic minority groups around Dewsbury, Batley and Huddersfield town centre, but very low numbers in other areas, particularly the South of the district.

Life expectancy and healthy life expectancy (the number of years lived in good health) have been increasing in Kirklees, but there are big inequalities in life expectancy and healthy life expectancy across the District depending on whether someone lives in a more deprived or less deprived area. Kirklees contains areas of high and low deprivation, with regions of highest deprivation found in some of the more densely populated urban areas to the north and east (including parts of Huddersfield, Dewsbury and Batley), and lower levels of deprivation found in the more sparsely populated rural areas to the south and west (including the Colne and Holme Valleys, Denby Dale and Kirkburton).We also know that those living in some of the most deprived areas of the District are more vulnerable to a wide range of health and wellbeing issues, such as smoking, obesity, etc.

The maps below show the risk levels for gambling harm across the 'ten localities' of Kirklees. Applicants are encouraged to identify the risk level of the area in which they are proposing to make an application and address any local issues around the risk of gambling-related harm. Any areas with a score of 15.4 – 18 are considered very high risk (identifiable by the darkest shade of red) and applications for these areas may be subject to a formal hearing to determine the application, if the licensing authority do not think the operator has considered the risks appropriately. This local area profile is to be considered alongside the other criteria and restrictions set out in the Statement of Principles.

Maps showing the prevalence of each individual risk factor in an area can be found at Appendix 1. Applicants are encouraged to consult these to gain a fuller understanding of the local context and issues in the area in which they are proposing to open an establishment. If required, larger copies of maps are available upon request. Please contact licensing@kirklees.gov.uk

4.2 Batley

In Batley, there are LSOA which are considered to be very high risk; these are highlighted in the darkest shade of red below.

Closer scrutiny of applications will take place where they fall within, or near to, the areas highlighted as high risk. Operators applying for licences, or varying licences within these areas, will have to demonstrate, via their local risk assessments, that they have considered the risks identified and have taken the necessary and appropriate steps to mitigate those risks.

Gambling Local Area Profile – All Risk Factors Combined - Batley
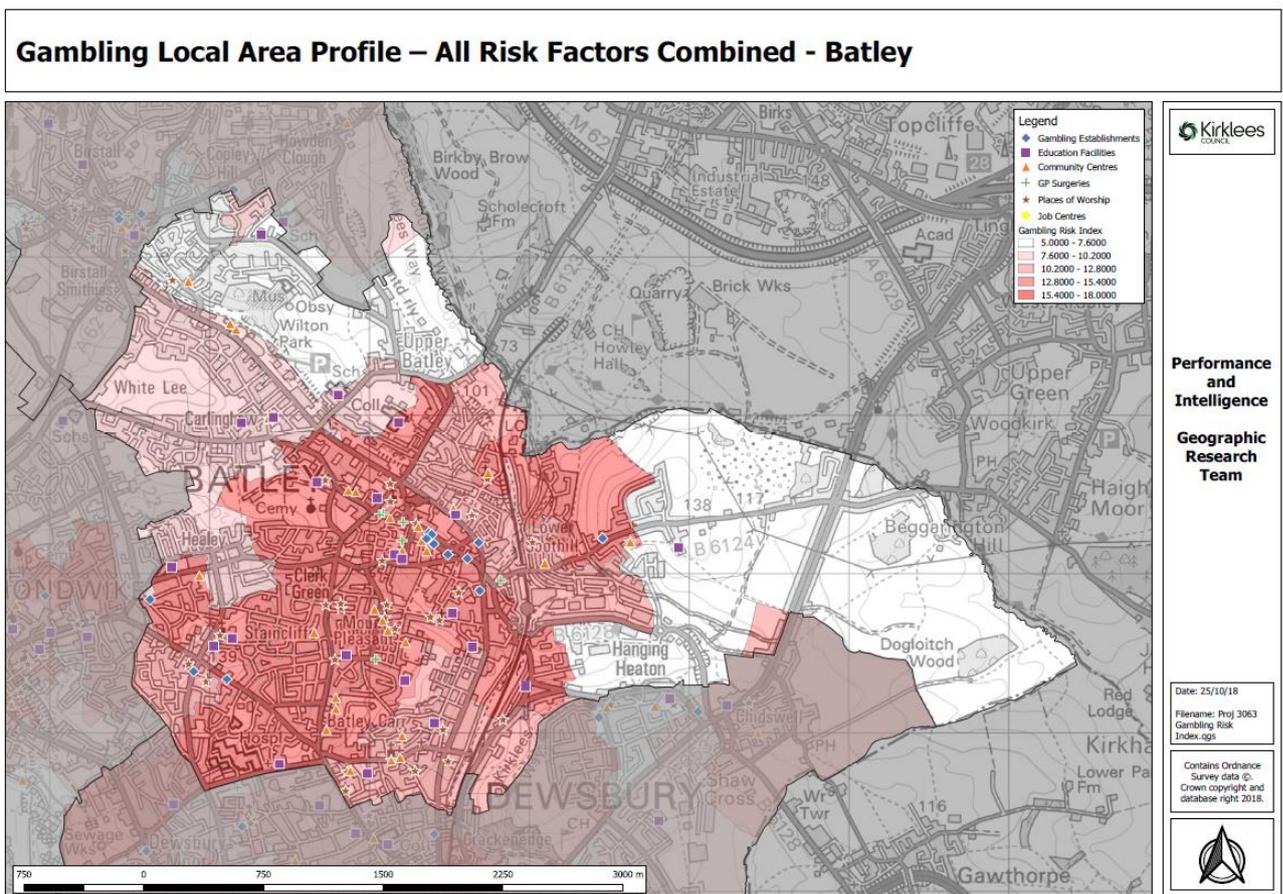

4.3 Birstall & Birkenshaw

There are no areas of Birstall & Birkenshaw identified as very high risk. However, gambling related harm can happen in any area. Applicants proposing to open an establishment here are still encouraged to consider the detailed maps in Appendix 1 and provide details of how they will mitigate for gambling related harm.

Gambling Local Area Profile – All Risk Factors Combined - Birstall and Birkenshaw
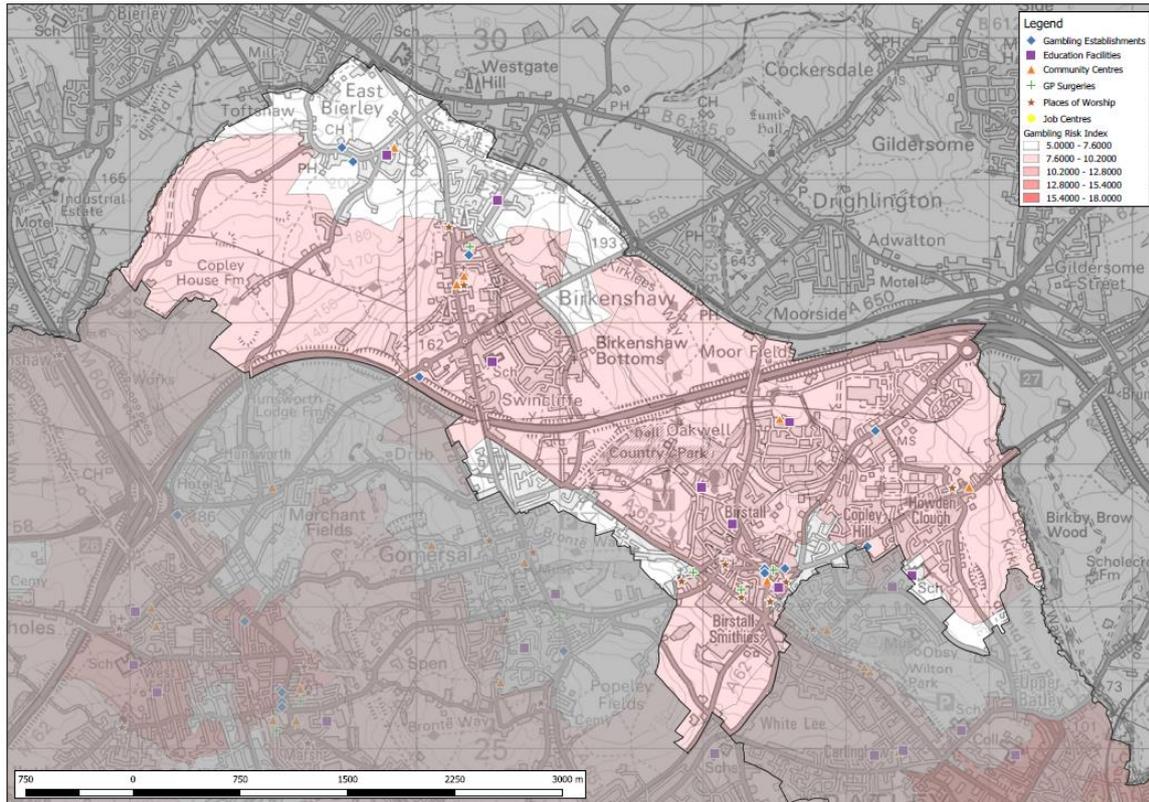

4.4 Colne Valley

There are no areas of Colne Valley identified as very high risk. However, gambling related harm can happen in any area. Applicants proposing to open an establishment here are still encouraged to consider the detailed maps in Appendix 1 and provide details of how they will mitigate for gambling related harm.

Gambling Local Area Profile – All Risk Factors Combined - Colne Valley
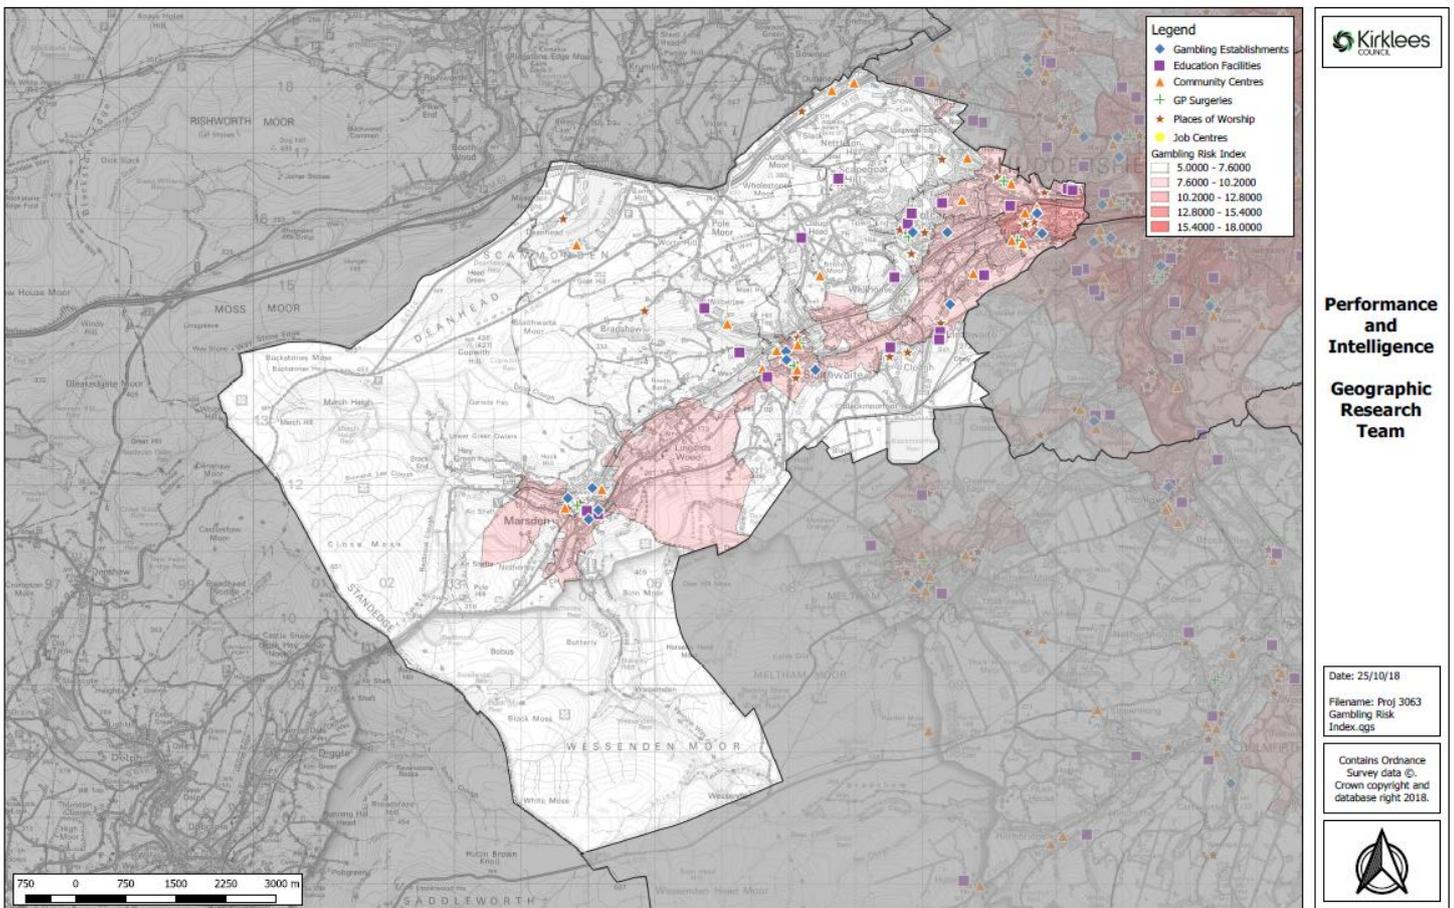

4.5 Denby Dale & Kirkburton

There are no areas of Denby Dale & Kirkburton identified as very high risk. However, gambling related harm can happen in any area. Applicants proposing to open an establishment here are still encouraged to consider the detailed maps in Appendix 1 and provide details of how they will mitigate for gambling related harm.

Gambling Local Area Profile – All Risk Factors Combined - Denby Dale and Kirkburton
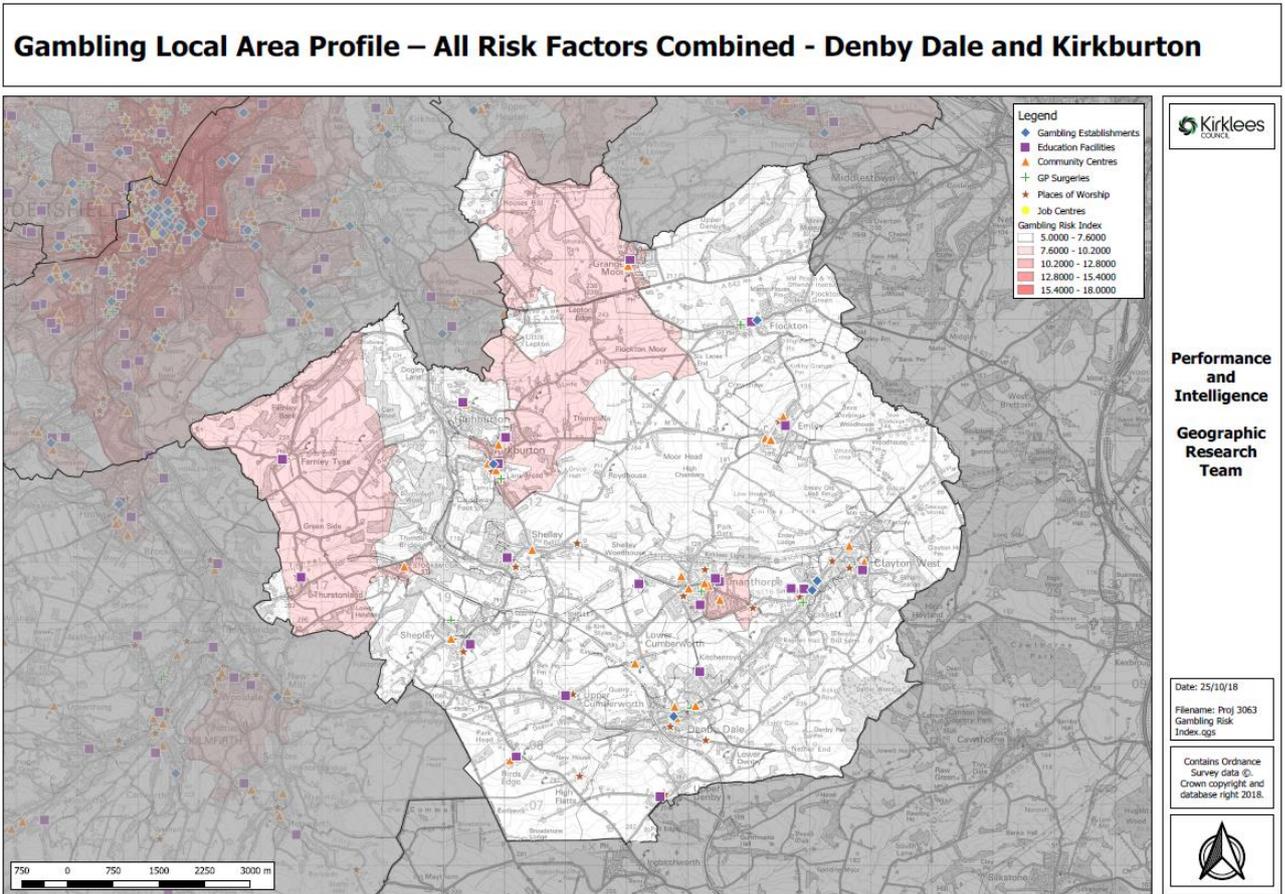

4.6 Dewsbury

In Dewsbury, there is one LSOA which is considered to be very high risk; this is highlighted in the darkest shade of red below.

Closer scrutiny of applications will take place where they fall within, or near to, the areas highlighted as high risk. Operators applying for licences, or varying licences within these areas, will have to demonstrate, via their local risk assessments, that they have considered the risks identified and have taken the necessary and appropriate steps to mitigate those risks.

The following postcodes fall within this high risk area:

4.7 Holme Valley

There are no areas of Holme Valley identified as very high risk. However, gambling related harm can happen in any area. Applicants proposing to open an establishment here are still encouraged to consider the detailed maps in Appendix 1 and provide details of how they will mitigate for gambling related harm.

Gambling Local Area Profile – All Risk Factors Combined - Holme Valley

4.8 Huddersfield North and Huddersfield South

Huddersfield North and Huddersfield South contain two very high risk LSOAs which fall into both area; these are highlighted in the darkest shade of red on the maps below

Closer scrutiny of applications will take place where they fall within, or near to, the areas highlighted as high risk. Operators applying for licences, or varying licences within these areas, will have to demonstrate, via their local risk assessments, that they have considered the risks identified and have taken the necessary and appropriate steps to mitigate those risks.
