Notes: * 'Age' is age at last birthday.

** Mean age is calculated using the underlying single year counts. Mean age is calculated by dividing the sum of each person's age last birthday (i.e. age in whole years) by the number of people.

*** Median age is calculated using the underlying single year counts. The median age is the middle value when all the ages are arranged in order from youngest to oldest, where 'age' is age at last birthday (i.e. in whole years).

Cells in this table have been randomly adjusted to avoid the release of confidential data.

Notes: * 'Age' is age at last birthday.

** Mean age is calculated using the underlying single year counts. Mean age is calculated by dividing the sum of each person's age last birthday (i.e. age in whole years) by the number of people.

*** Median age is calculated using the underlying single year counts. The median age is the middle value when all the ages are arranged in order from youngest to oldest, where 'age' is age at last birthday (i.e. in whole years).

Cells in this table have been randomly adjusted to avoid the release of confidential data.

Notes: * The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.

A person not living in a couple can be classified married (or re-married) if they denote their marital status as married (or re-married) but have no spouse or partner resident in the household.

Cells in this table have been randomly adjusted to avoid the release of confidential data.

Notes: ** Excludes working at home; no fixed place of work; working at offshore installation; working outside UK.

The distance travelled is a calculation of the straight line between the postcode of place of residence and postcode of workplace.

For the purposes of this table; public transport is defined as Underground; metro; light rail or tram; train; and bus minibus or coach.

*** people who travel to work by public transport who live in a household with/without a car or van.

figures are for people aged 16 and over NOT 16 to 74

The final two columns show the percentage of people who travel to work by public transport.

Cells in this table have been randomly adjusted to avoid the release of confidential data.

Note: * The occupancy rating provides a measure of under-occupancy and overcrowding. For example, a value of -1 implies that there is one room too few and that there is overcrowding in the household. The occupancy rating assumes that every household, including one person households, requires a minimum of two common rooms (excluding bathrooms).

* A dependent child is a person in a household aged 0 - 15 (whether or not in a family) or a person aged 16-18 who is a full-time student in a family with parent(s).

** For the Census; part-time is defined as working 30 hours or less a week. Full time is defined as 31 or more hours a week.

*** For the purposes of this table; a lone parent is defined as a parent with a dependent child living in a household with no other persons (whether related to that dependent child or not). This definition is to be distinguished from the standard definition of a lone parent used in other tables.

1991 Census lone parent households contain children aged 0-15 NOT dependent children 0-18
